

YOUR GUIDE TO:
PICKING PLANTS FOR POTS
WITH

Katie's Garden
plant centre

Brighten up your steps, patios and decking areas with some well-chosen pot plants!

HERBS

Herbs are as varied in appearance as they are in taste, so having a selection is irresistible!

Come and see (and smell!) the new 'Basil Aristotle', chocolate mint and lemon verbena.

Multiple herbs in a pot together is great for the summer; in the long-term give them a pot each.

ALPINES

Garden in miniature with alpines!

You might not have acres of garden but that doesn't mean you can't have a great collection of plants in all shapes and colours.

Sun-loving plants, they don't need much watering and most will be happy in shallow troughs, pots and bowls.

ROSES

Roses like to send out deep roots, so make sure you give them a nice tall pot to live in. The patio roses have been specially bred to do well in containers. Repeat flowering, they come in a great choice of colours, are often scented and most grow to 1-3ft in height.

CLEMATIS

Like the Roses, Clematis need big pots for their big rootballs - at least 2ft tall.

Varieties from the Raymond Evison 'Boulevard' collection have stems covered almost top to toe in large, colourful blooms.

PERENNIALS

Choose something with a neat habit, and remember that after a few years you should plan to 'release' it into a border.

Try Salvia Hot Lips or one (or more!) of our 30 different Heucheras.

LAVENDERS

You will find over a dozen varieties at Katie's Garden - both English and French - all evergreen, scented and popular with the bees.

Lavenders do best if watered with rainwater.
